

# Construction Update

## Parnassus Research and Academic Building

### UCSF Dentistry:

#### Noise and Access Impacts from UC Hall Demolition into 2024

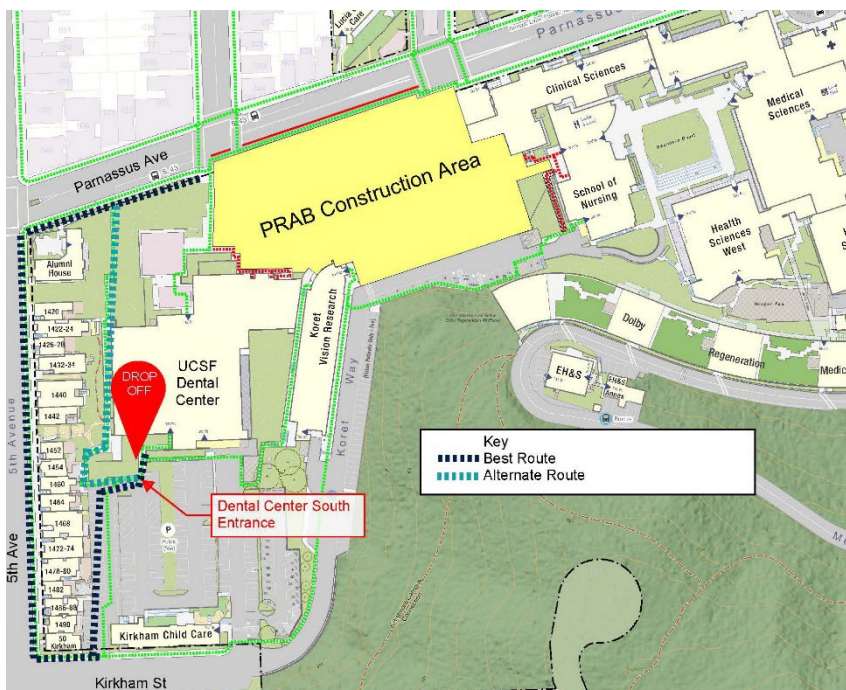

Update as of August 2023

Hard demolition of UC Hall is expected to continue through early 2024 to make way for the new Parnassus Research and Academic Building (PRAB).

**Access to UCSF Dental Center** is impacted from PRAB construction.

Please use the Dental Center's south entrance for all pedestrian pickups and drop-offs due to traffic congestion and safety concerns near the PRAB site. See map for the best route to the south entrance.

**Expect noise** near the PRAB construction site from demolition and other work.

#### Purpose of the Project

A new state-of-the-art Parnassus Research and Academic Building (PRAB) is under construction. PRAB will be a new home for the School of Nursing, and have an expanded education space, and space for multiple health and science disciplines. The new building will encourage collaboration and support UCSF staying at the cutting edge of discovery, learning and care.
